EDUCATION

09/2018 – 12/2022   **Computer Systems Engineering Degree | CGPA: 8.73 , *Carleton University***

EXPERIENCE

06/2023 – 04/2025   **IT Technician – Cloud Operations | Joint Defence Cloud Program, Department of National Defence**

- Manage cloud infrastructure, focusing on Azure services such as Azure Portal and Azure DevOps, with experience in GCP and AWS.
- Configure and optimize cloud networking solutions, ensuring seamless integration across multiple defence clients (e.g. Air Force, Navy, Army).
- Provide technical support to defence clients, troubleshooting issues and ensuring cloud environments meet operational needs.
- Enforce policy compliance, security standards, and prepare detailed documentation for system configurations and client interactions.

09/2018 – 12/2022   **Project Experience in Software Development and IoT Systems, Carleton University**

- Develop sensor-based IoT systems using Python, MySQL, and cloud analytics.
- Build and multithread an elevator simulation system with Java, optimizing performance.
- Lead a team to create a smart office system with machine learning insights and a web interface using Django
- Design user-friendly GUIs and implement testing for real-time data and simulations across multiple projects.

02/2017 – 04/2023   **Department Manager, No Frills Grocery Store**

- Assuring all daily work is completed within established timelines and all customers receive prompt service.
- Partnering with the store manager and district manager to ensure merchandise availability for customers.
- Supervising and training of assigned sales associates. Ensuring subordinate associates are aware of sales goals, events, incentive programs, store policies, etc.

PROFICIENCIES

- Azure Portal
- Azure DevOps
- Google Cloud Platform (GCP)
- Amazon Web Services (AWS)
- Cloud Networking Configuration
- Virtual Machine (VM) Management
- Resource Group Management (Azure)
- Cloud Security Best Practices
- Identity and Access Management (IAM)
- Multi-Cloud Architecture
- Infrastructure as Code (IaC)
- Function/Logic Apps

- PowerShell Scripting
- API Integration and Management
- Monitoring and Logging
- Policy Enforcement and Compliance
- Security Incident Management
- Network Troubleshooting and Diagnostics
- Client Support and Stakeholder Communication
- Cloud Service Automation
- Technical Documentation
- Service-Level Agreements (SLA) Management
